

User Documentation for Agora

Student:

1. Upon opening the app for the first time, the student can create an account by entering their email address/username and creating a password.
2. After signing up or logging in, students are directed to a screen where they can join an office hours session or logout of the app.
3. If they choose to join a session, they can see the locations of where instructors have created sessions on Google Maps and choose which session that want to join.
4. After choosing a session, the student has the option of adding themselves into the help queue, so the instructor can see who is present/who needs help.
5. The student also has the option of joining the discussion forum, where they can discuss questions/problems they are having, and take pictures or attach photos.

Instructor:

1. Upon opening the app for the first time, the instructor can create an account by entering their email address/username and creating a password.
2. After signing up or logging in, instructors are directed to a screen where they can create an office hours session or logout of the app.
3. When creating a session, Google Maps will be pulled up so that the instructor can specify the location of the session.
4. After creating the session, the instructor has the option of seeing the help queue that contains students who need help.
5. The instructor also has the option of joining the discussion forum, where they can discuss questions/problems with the students, and take pictures or attach photos.
