

User Documentation for Agora

Student:

1. Upon opening the app for the first time, the student can create an account by entering their email address/username and creating a password.
2. After signing up or logging in, students are directed to a screen where they can join an office hours session, if one exists, or logout of the app.
3. If they choose to join a session, they can find the location of the created office hours session on Google Maps by clicking on the 'Get Location' button.
4. After joining and locating the session, the student can add themselves to the help queue, so the instructor can see who is in line for assistance. The student also has the option of attaching a photo of themselves to make it easier for the instructor to locate them.
5. The student can also join the discussion forum, where they can discuss questions/problems they are having and give assistance to / receive assistance from other students.

Instructor:

1. Upon opening the app for the first time, the instructor can create an account by entering their email address/username and creating a password.
2. After signing up or logging in, instructors are directed to a screen where they can create an office hours session or logout of the app.
3. When creating a session, the instructor's coordinates are stored so that students will be able to find their location upon joining their session.
4. After creating the session, the instructor has the option of seeing the help queue that contains students who need help. The instructor is able to click on student's photos to inflate them, and is able to regulate the queue by deleting students from it.
5. The instructor also has the option of joining the discussion forum, where they can take part in the discussion of questions/problems with the students.
